

INSULATED TOOLS FOR LIVE WORKING

MADE IN GREAT BRITAIN

INSULATED TOOLS FOR LIVE WORKING

ITL has been manufacturing premium tools in West Sussex since 1965. Over the years the equipment and personnel have changed but the mission remains the same: make the longest lasting, hardest wearing, and safest insulated tools.

We are the only tool company to injection mold with superior Nylon 11 bioplastic.

All our production tools are uniquely 100% tested to IEC 60900 Category C and ASTM F1505

MAXIMUM PERSONAL PROTECTION – WORLDWIDE

- Nylon 11 bioplastic
- Tool and insulation bond as one
- Impact resistant
- Flame retardant
- Stronger and harder than PVC coated tools
- 100% production tested –10,000 volts for 3 minutes
- We comply with and go beyond IEC 60900 – the international standard for Live Working Hand Tools
- Category “C” assured – for operation within greater temperature range -40°C to +70°C / -40°F to +158°F
- Usage enables compliance with workplace safety standards NFPA 70E and CSA Z462
- Lifetime warranty on tool and insulation

CONTENTS

- 7 Kits & Socket Sets
- 23 Pliers
- 26 Cutters
- 29 Knives, Saws & Files
- 31 Wrenches
- 34 Torque Tools & Kits
- 39 Sockets, Ratchets & Drive Tools
- 45 Podger Ratchets
- 47 Screwdrivers
- 49 Hex Keys
- 51 Nut Drivers
- 53 Link Extractors
- 57 Shrouds & Wedges
- 60 Specialist & Accessories
- 63 Power Tool Isolation
- 65 Insulating Gloves

INSULATED TOOLS A HISTORY OF EXCELLENCE

It was the first week of January in 1965. Sean Connery was topping the box offices in Goldfinger, the Beatles were at no.1 in the charts with I Feel Fine.... And to somewhat less fanfare, an electrical safety revolution was underway in a small town in Sussex, England.

By the early 1960s hand tool safety had not kept up with the rapid advances in electrical infrastructure through the first half of the 20th century.

Power utilities in England were reporting burns to engineers working on new M.V. distribution systems – something had to be done. A Committee was formed bringing Chief Engineers from each utility together to find a lasting solution.

NYLON 11

After rigorously trialing tools with PVC insulation, cellulose acetate and many others, one material stood above the rest: Nylon. Specifically Nylon 11 bioplastic, a member of the nylon family derived from castor beans.

The Committee found that when liquefied under high temperature and injection-molded around a metal tool, it produced the ideal fusion of impact resistance, tensile strength, and electrical insulation.

Nylon 11 consistently outperformed every other material in strength and safety.

There was just one problem – no-one was yet capable of making such advanced tools.

Ken Stephen, an engineer on the Committee, set up ITL to do just that.

1st Generation ITL tools in neutral color from

THE BIRTH OF ITL

With his brother John, Ken acquired a small workshop in St. James' Road East Grinstead.

It would become the base of insulated tool manufacturing in the UK – starting with just 3 molding machines and an AC transformer, ITL began supplying all the power utilities with the safest tools available anywhere in the world.

Demand began to outstrip our ability to supply, so by the early '80s we moved into expanded premises where we remain today.

We have increased capacity five-fold since then, and began supplying the North American market by the '90s.

Peter Norman, our first General Manager

Our electrical testing facility circa 1983

NEW FRONTIERS

ITL is now a global leader with distribution hubs worldwide.

The standards we set have been often imitated, but never bettered.

STRONGER, SAFER AND REASSURINGLY OVER-ENGINEERED

KITS & SOCKET SETS

Our field-tested toolkits can be found in electrical facilities all over the world. Our multi-purpose kits give engineers the wide breadth of tools they need to confidently approach any problem, while our specialist kits are designed to safely tackle technical jobs like cable splicing, EV and battery adjustment and link box maintenance

Our flagship kit is the choice of electrical professionals worldwide and is available in both metric and standard versions

Our premium case kits provide electrical engineers with a firm grounding in tackling common jobs safely, while the removable inserts allow flexibility for customization

PLIERS

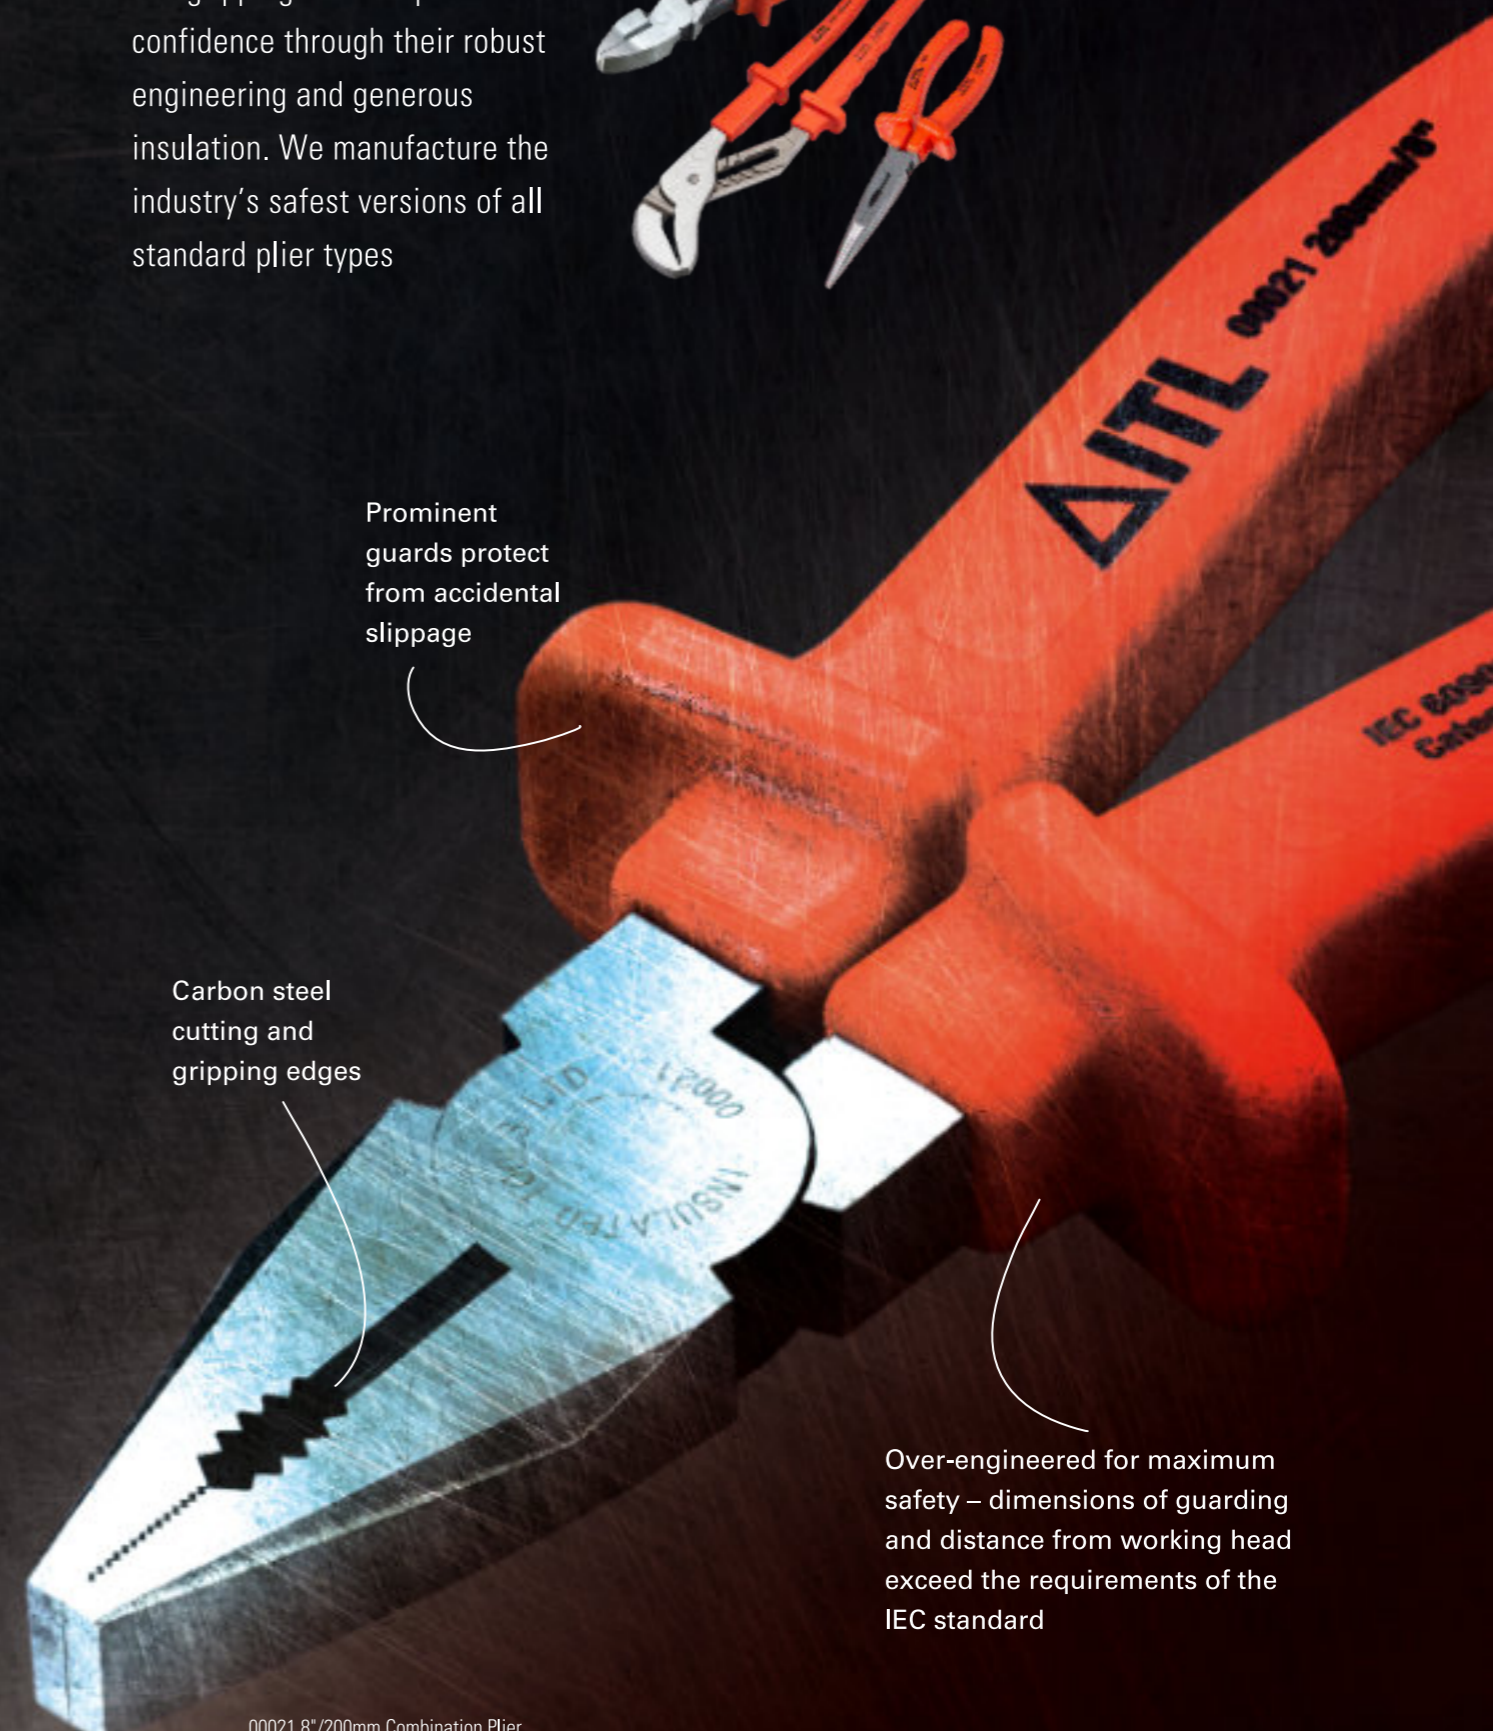

Our gripping tools inspire confidence through their robust engineering and generous insulation. We manufacture the industry's safest versions of all standard plier types

Prominent guards protect from accidental slippage

Carbon steel cutting and gripping edges

Over-engineered for maximum safety – dimensions of guarding and distance from working head exceed the requirements of the IEC standard

TORQUE TOOLS

“Torque is a rotational force that causes something to turn around a central point, such as an axle or bolt”

$$T = r \times F$$

Why use Torque Tools for electrical work?

Ensuring that electrical fastenings are of the correct tension is vital to their proper functioning and overall safety.

Applying torque to the required tolerance is the best way of achieving this.

Too loose?

- Risk of fire from thermal runaway
- Risk of shock from arcing
- Inefficient energy transfer

Too tight?

- Risk of stripping the thread
- Damage to the conductor which can lead to failure
- Damage to the earth wire which could cause the system to become energised

ITL Torque Wrenches have a double safety benefit – safety to the user through industry-beating insulation, and safety to the people who use and rely on the electrical system through accurate torquing.

Our new and improved torque wrenches have been designed to ensure that the correct torque is safely applied to live connectors, fixings and fasteners.

They are the only ISO 6789 compliant tools to be fully insulated via injection moulding and compliant with IEC 60900 Category C and ASTM F1505.

Our wrenches range from 2 N·m to 100 N·m giving you a torque solution for every job.

Precision engineered head for accurate readings

Expertly designed collar using Gap-Tec to ensure no sparks jump the gap

Impact resistant polycarbonate tubing for the toughest jobs

Ovi-Grip handle for superior grip and comfort

Grooved cap design for easy adjustment

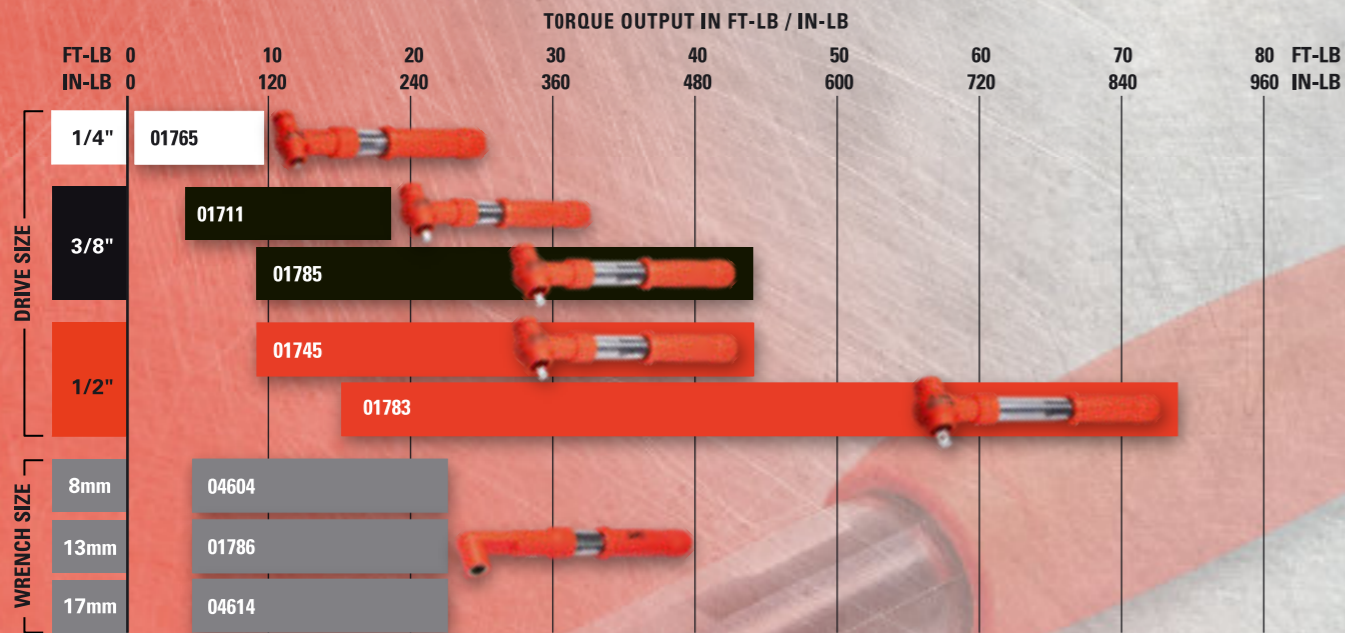

Clear dual scale in N·m and lbf/ft

Increment gauge for instant accuracy

New decimal point scale for improved accuracy

Twist and push to set correct output

SOCKETS, RATCHETS & DRIVE TOOLS

Socketry in 1/4", 3/8" and 1/2" drive for all electrical applications

Ratchet has integral non-conductive components that prevent metallic parts from short-circuiting

Chrome vanadium base tooling for quality and longevity

01750 1/2" Drive Reversible Ratchet

Socket sheathing is rigid, ensuring that the correct safe distance between conductive parts is always maintained. Insulation is designed to overlap when mated with our insulated square drives, preventing a spark from jumping the gap

PODGER RATCHETS

Podgers, sometimes known in their uninsulated form as scaffold ratchets, are the ideal ratcheting tool for when you need to efficiently switch between two frequently adjusted nut sizes

Extra thick insulation molded to the handle to protect against drops and impact damage

Rigid guarding to protect against accidental slippage

Quick-change switch to reverse direction of ratcheting

03030 13mm x 17mm Podger Ratchet

HOLDING TOOLS

CODE	DESCRIPTION
03116	Universal Holder
03117	95mm Holder
03118	120mm Holder
03119	185mm Holder
03120	300mm Holder
03122	Waveform Connector
03123	Double Waveform Connector

FUSE CARRIER

CODE	DESCRIPTION
03106	Fuse Carrier

KNOCKOUT TOOL

CODE	DESCRIPTION
03101	Knockout Tool

PLUG REMOVER

CODE	DESCRIPTION
03102	Plug Remover

RELEASE TOOL

CODE	DESCRIPTION
03103	Release Tool

HOOKED SHEATH LIFTER

CODE	DESCRIPTION
03108	Hooked Sheath Lifter

PAVEMENT KEY

CODE	DESCRIPTION
01277	Pavement Key

BRADAWL

CODE	DESCRIPTION
01858	Bradawl

SAFETY HOOK

CODE	DESCRIPTION
09000	Safety Hook

MIRRORS

CODE	DESCRIPTION
01850	Inspection Mirror
01851	Large Inspection Mirror
01852	Adjustable Handle for Large Inspection Mirror

NON CONDUCTIVE TWEEZER

CODE	DESCRIPTION
03171	Tweezer 160mm

DRUMMOND CLAMP

CODE	DESCRIPTION
01759	Insulated Socket for Drummond Clamp

SWITCHBOARD MATTING

CODE	DESCRIPTION
05145	Class 0 Switchboard Matting 1000V (1m x 1m)
05146	Class 0 Switchboard Matting 1000V (1m x 2m)

TOOL CARRIERS

CODE	DESCRIPTION
03191	Zipped 12 Pocket Tool Roll
03197	Electricians' Belt Pouch
03199	Orange Holdall with Ground Sheet
03200	Black Deluxe Tool Case

Tools sold separately

UMBRELLA

CODE	DESCRIPTION
03193	Large Fieldwork Umbrella

POWER TOOL ISOLATION

Accidental cable strike is a risk when drilling into pavement - our drill isolator protects workers from electric shock through its unique design and safety features

Thick injection-molded insulation for total safety and robustness in the field

Internal non-conductive coupling

Keyless SDS Plus chuck

06900 Haldane Drill Isolator

POWER TOOL ISOLATION

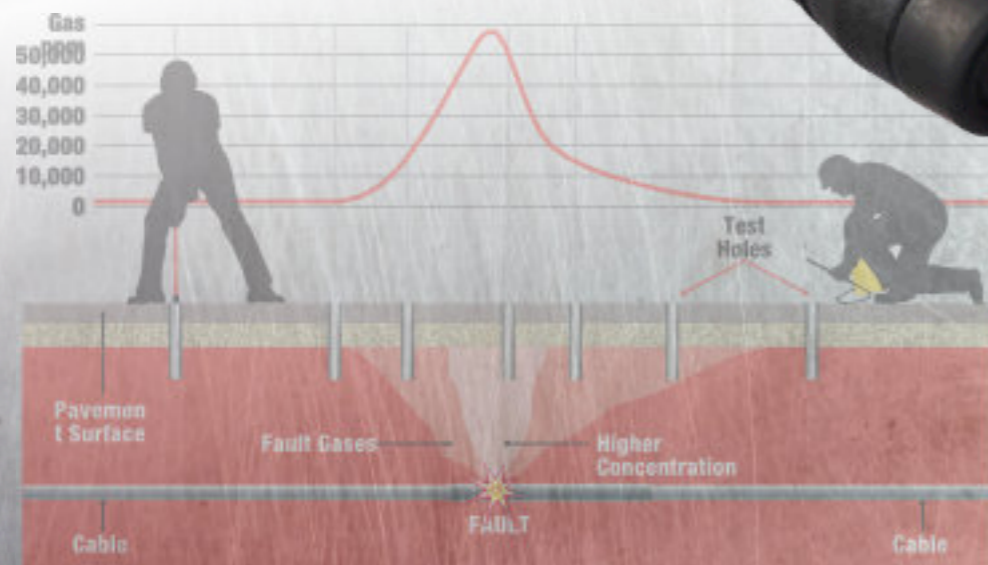

Developed with the leading Power Utilities, the Haldane Drill Isolator is the only tool of its kind approved for use on the British energy network for safety drilling into pavement where cable strike is a possibility

POWER TOOL ISOLATION

CODE DESCRIPTION

06900 Haldane Drill Isolator

- Protects drill operators from electric shock
- Design and tested to exceed IEC 60900
- Can be used in conjunction with cable fault finding "Gas Sniffer" devices when drilling pilot holes

INSULATING GLOVES

Gloves are the ideal accompaniment to our tools. They provide primary protection for voltages from 500 to 26,500 AC and 750 to 39,750 DC

Natural rubber processed for strength and elasticity

Ergonomic design for gripping and dexterity

Sizing from small to extra large

05110 Class 0 Insulating Glove 1000V

GLOVES

CLASS 00		CLASS 0

OUR CORE RANGE SPANS CLASS 00 TO CLASS 3
Simply select the appropriate glove based on the maximum voltage workers could be exposed to – see usage voltage columns in the table below.

CLASS	TEST AC VOLTAGE	USAGE AC VOLTAGE	TEST DC VOLTAGE	USAGE DC VOLTAGE
00	2,500	500	10,000	750
0	5,000	1,000	20,000	1,500
1	10,000	7,500	40,000	11,250
2	20,000	17,000	50,000	25,500
3	30,000	26,500	60,000	39,750

Insulating gloves require periodic re-testing to ensure continual safety and compliance. Contact us about our re-testing service

GLOVE RE-TESTING AND RE-CERTIFICATION

CODE	DESCRIPTION
05140	0 - 10 kV (Classes 00, 0, 1)
05141	11 - 20 kV (Class 2)
05142	21 - 30 kV (Class 3)
05177	40 kV (Class 4)

THE FACTS SPEAK FOR THEMSELVES

FACT

ITL is the only manufacturer to insulate its tools with Nylon 11 bioplastic

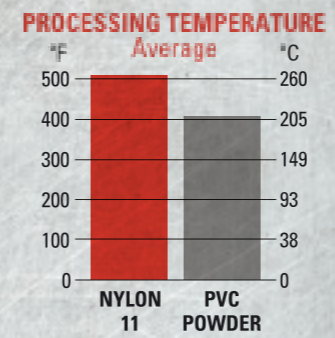

FACT

Unique Nylon 11 injection molding process increases tool safety and durability

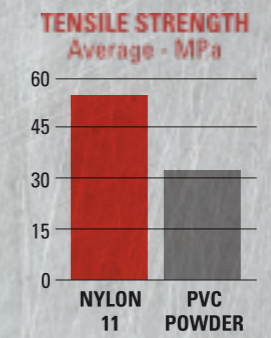

FACT

Tool and insulation bond as one
Higher tool to insulation integrity

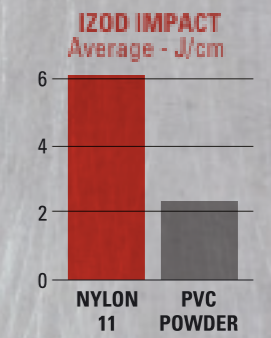

FACT

Much stronger than PVC coated product
Longer tool life and increased cost effectiveness

FACT

Harder than PVC dipped product
Tougher tools that withstand extreme field requirements

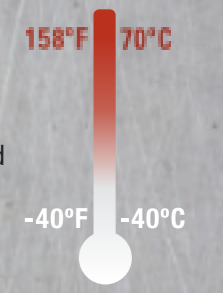

FACT

LIFETIME WARRANTY
TOOL & INSULATION

FACT

All ITL tools comply with and exceed International Standard IEC 60900 including category "C" for operation within greater temperature range
